About the Mobile Video Converter

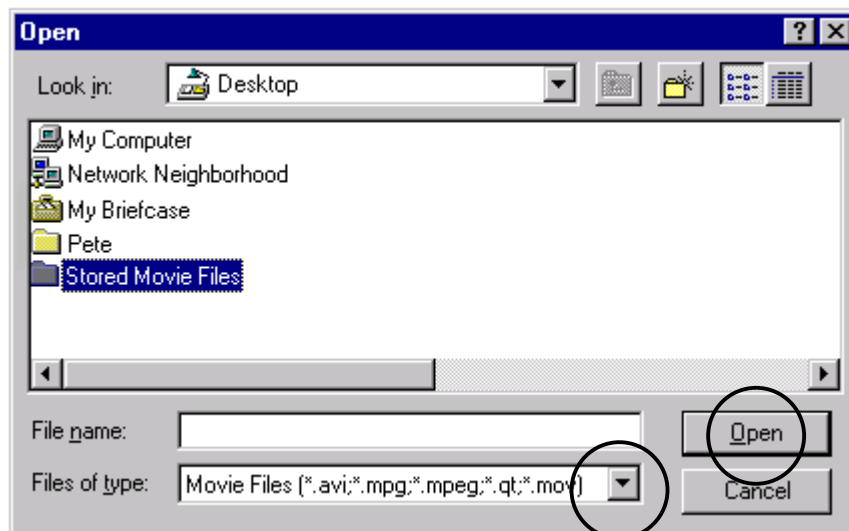

The **Mobile Video Converter** converts popular PC-based video formats into a special video format that can be seen, heard and enjoyed on your CASSIOPEIA™ Color Palm-size PC. The Desktop PC-based video formats that can be converted and played on your Color CASSIOPEIA include, MPEG-1, AVI™ and QuickTime.™

How to use the Mobile Video Converter

After the dialog window labeled, "**CASIO Soft – Mobile Video Converter v1.0**" appears on your screen, type in the "**Path**" of the "**Source**" video file you wish to convert or click on the "**Browse**" button to locate the appropriate "**Source**" video file.

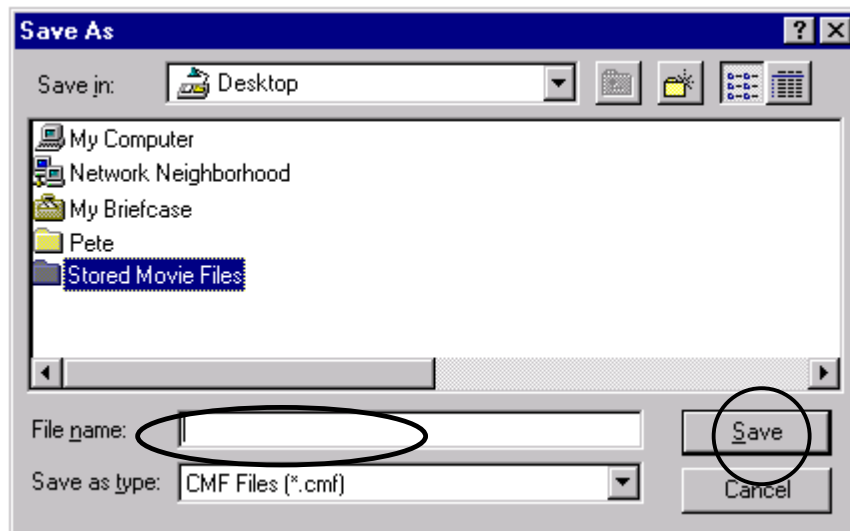

Activating the "**Browse**" feature will launch this window (shown below):

Click on the down arrow button (shown) to help sort through all available "**Source**" video files found within your Desktop PC.

Tap the [**Open**] button when finished.

How to use the Mobile Video Converter (continued)

Next, locate a “**Target**” area where you would like the (soon to be converted) “**CMF File**” saved and stored.

Type the name of the new “**Target**” file in the field (shown above).

Tap the [**Save**] button (shown) when finished.

Next, select a “**Target Video Size**” by clicking on the small down arrow button.

208 x 160 The Viewer’s maximum viewing screen size.

160 x 112 Smaller screen size, however uses less of your device’s available memory.

Next, select a desired “**Sound Quality**” by clicking on the small down arrow button

High: Maximum “**Sound Quality**” setting. Recommended setting for Stereo playback through your CASSIOPEIA’s Stereo headphone jack.

Normal: Normal “**Sound Quality**” setting. Use this setting for normal audio playback through your CASSIOPEIA’s built-in Dynamic speaker. **Note:** This setting also minimizes the memory requirements of the output file.

How to use the Mobile Video Converter (continued)

Click on the **[Convert]** button to continue and start the video format file conversion process.

Immediately after clicking on the **[Convert]** button, two dialog windows will appear showing graphic representation of the file conversion in progress - one dialog window for Audio and one for Video (shown below).

At any time, you can click on either "**Cancel**" buttons to terminate a video conversion in progress.

When the video file conversion process is complete, you will be ready to drag and drop the newly converted (CMPEG) video file into your Color CASSIOPEIA for viewing!

Please refer to the Windows® CE User's Guide provided by Microsoft® for instructions on how to transfer files from your Desktop PC to your Windows CE device, via the "**Mobile Devices**" folder.

IMPORTANT: In order to view the converted video file on your CASSIOPEIA, you must store the newly converted .cmf file into a folder labeled "**My Documents**".

The Pull-Down Menus

On-Line Help

On-line “Help” can be accessed at any time. Simply go to the [**H**elp] pull-down menu, then select and click on the “**Help Topics**” selection.

About

Clicking on the “**About**” selection will launch a small dialog window announcing the Viewer’s version number and legal information.

How to Exit

Go to the [**F**ile] menu, then select and click on the “**Exit**” selection.
